

## CORRECTIONS

In the Original Article titled “Real-world multiple myeloma management practice patterns and outcomes in selected Central and Eastern European countries,” published in the September 2018 issue (Coriu D, Dytfeld D, Niepel D, et al. *Pol Arch Intern Med.* 2018; 128: 500–511), the following corrections were made: In **FIGURE 1** on page 503, in the section “Current line of treatment (n = 296)” at the top of the figure, the third line from the top (23%; CI; obs 18.2–27.8; n = 68) should read “2L ind.” rather than “1L ind.” The section in the middle of the figure should read “Reasons for never having treated the patient (n = 9)” rather than “Reasons for not currently treating the patient (n = 9).” The number of patients in the section “Reasons for not currently treating the patient (n = 9)” should read “n = 217” rather than “n = 9.”

In **FIGURE 2** on page 505, the figure title was incomplete. The following legend was added for the figure to be fully explanatory: “Blue boxes indicate information from the cross-sectional phase; white boxes indicate information from the retrospective phase.”

The article is correct at [www.pamw.pl](http://www.pamw.pl).
