Table S1. Development of echocardiographic findings.				
Date	August 2007	September 2018	November 2018	February 2019
Echocardiography	TTE	TTE	TEE	TTE
EF	50-55%	55-60%	-	50%
LAESV	-	172 ml/m ²	-	135 ml/m ²
Maximum dimensions of the biggest mass	no mass	4,4 x 2,8cm	1,0 x 0,7 cm	no mass
Mitral stenosis grade	mild-moderate	moderate	moderate	moderate
Mitral regurgitation grade	-	moderate	mild	mild
TTE - transthoracic echocardiography; TEE - transesophageal echocardiography; EF - ejection fraction; LAESV - left atrial end-systolic volume, - - not mentioned on study report
