Table S1. Laboratory test results

Hormonal assessment before diagnosis

Variable	Result
Circadian serum cortisol rhythm, $\mu\text{g}/\text{dL}$	
6 AM	22.2
12 AM	16
Cortisol in a 24-hour urine collection, $\mu\text{g}/\text{volume}$	97.8
1mg dexamethasone suppression test	
Serum cortisol, $\mu\text{g}/\text{dL}$	15.19
ACTH, pg/ml	74.4

Hormonal assessment after surgery

Variable	Time after surgery, months			
	2	11	16	120
ACTH, pg/ml	27.6	42	57	49.8
Circadian serum cortisol rhythm, $\mu\text{g}/\text{dL}$				
6AM	1.41	5.12	8.56	5.32

6 PM		10.1	11.25
12 AM		0.85	0.67

Abbreviations: ACTH, adrenocorticotrophic hormone
