Figure S1. Functional parameters indicating right ventricle failure with ejection fraction of 14%.

	Absolute Values	BSA Normalized Values
Ejection Fraction:	14 %	
End Diastolic Volume:	76.15 ml	57.65 ml/m ²
End Systolic Volume:	65.77 ml	49.80 ml/m ²
Stroke Volume:	10.38 ml	7.86 ml/m ²
Cardiac Output:	0.80 l/min	0.61 l/min/m ²
Wall Mass (Mean):	32.64 g	24.72 g/m ²
