Table S1. Percentage (%) of children at high risk of developing a disease entity (Group 2) according to ICD classification.

Group 2	ICD classification	Disease entity	Percentage of children [% (n)]
Echocardiographic and electrocardiographic assessment	Q 21.1	Atrial Septal Defect	0.75 (1)
	Q 25.8	Other congenital malformations of great arteries	0.75 (1)
	Q 23.1	Congenital insufficiency of aortic valve (Bicuspid aortic valve)	0.75 (1)
	Q 22.8	Other congenital malformations of tricuspid valve	0.75 (1)
Orthopaedic assessment	M21.4	Flat foot [pes planus] (acquired)	30.3(30)

Table S2. Percentage (%) of children with a detected or reported disease entity according to ICD classification.

Group 3	ICD classification	Disease entity	Percentage of children [% (n)]
Echocardiographic and electrocardiographic assessment	Q 21.1	Atrial Septal Defect	0.75 (1)
	Q 23.1	Congenital insufficiency of aortic valve	3.0 (4)
	Q 23.3	Congenital mitral insufficiency	6.0 (8)
	I49.1	Atrial premature depolarization (Atrial premature beats)	0.75 (1)
Orthopaedic assessment	M21.4	Flat foot [pes planus](acquired)	12.1 (12)
	M92.5	Juvenile osteochondrosis of tibia and fibula	2.0 (2)
	M40.1	Other secondary kyphosis	2.0 (2)
	Q66.2	Metatarsus varus	6.0(6)
	Q68.4	Congenital bowing of tibia and fibula	1.0(1)
	Q65.8	Other congenital deformities of hip (Femoral torsion)	3.0 (3)
	M20.1	Hallux valgus (acquired)	2.0 (2)
